RE: Requested Data  
Safety-Kleen Facility, North Industrial Corridor Site, Wichita, Kansas

Dear Ms. Tauscher:

Attached is a Site Map and summary tables with historical analytical data from the perimeter wells at the Former Coastal-Derby Refinery Site. The summary tables include the most recent data submitted to KDHE. This information is from the report entitled *Quarterly Progress Report, April 16, 2000 to July 15, 2000 and Annual Report, Wichita Facility, Wichita, Kansas*. As discussed in the February 1, 2001 meeting, KDHE and EPA will anticipate receiving a letter proposal in mid-February for the installation of an upgradient monitoring well and collection of surface water samples from Chisolm Creek. Please call me at (785) 296-1935 if you have any questions.

Respectfully,

Christine R. Jump  
Environmental Geologist  
State Remedial Unit/Remedial Section  
Bureau of Environmental Remediation
